

**NOW THAT SPRING HAS ARRIVED,
HERE ARE SOME TIPS FOR AN
ENVIRONMENTALLY HEALTHY LAWN:**

- Mow high: set mower blades 3-5"; avoid cutting off more than 1/3 of the grass blade.
- Water infrequently but deeply every 7-10 days if there has been no good rain. This may take 2-4 hours depending on your sprinklers.
- Test your soil for pH balance. Cornell Cooperative Extension can do this for you (631-727-7850).
 - Seed with tall fescue blend.
